
Minolta PageScope Plug-In for CA Unicenter v2.0

28.Sep.2001

=====
Minolta PageScope Plug-In for CA Unicenter (UnicenterTNG 2.2/2.4)
=====

Minolta PageScope Plug-In for CA Unicenter is subject to the terms detailed in the license agreement accompanying the program (the Plug-In).

IMPORTANT! Before going any further, please
read and accept the terms in the file LICENSE.

=====
Feature
=====

PageScope Plug-In for CA Unicenter provides the following functions.

1)Device discovery

PageScope Plug-In for CA Unicenter enables you to discover Minolta devices in the standard discovery process of Unicenter and see the devices by their unique icons.

2)Device Status

This Plug-In changes the colors of the devices according to the device status. The Plug-In also sends a message to a UnicenterTNG console if the devices are in any unusual status.

3)Access to internal web servers

This Plug-In adds a menu in order to access the devices' internal web servers called PageScope Light which enable you to check or modify any settings.

System Requirements

Before installing PageScope Plug-in for CA Unicenter, you should check that your system meets the software requirements below.

#We recommend you to use the latest version service packs.

[UnicenterTNG 2.2]

*UnicenterTNG 2.2

*Microsoft Windows NT 4.0

*Microsoft SQL Server 6.5

*TCP/IP Protocol

*Microsoft SNMP Service

*Any Web Browser (Microsoft InternetExplorer 4.0 or later / Netscape Navigator 4.5 or later)

[UnicenterTNG 2.4]

*UnicenterTNG 2.4

*Microsoft Windows NT 4.0/2000

*Microsoft SQL Server 6.5/7.0/2000

*TCP/IP Protocol

*Microsoft SNMP Service

*Any Web Browser (Microsoft InternetExplorer 4.0 or later / Netscape Navigator 4.5 or later)

Please see "Getting Started" for more details.

How to use PageScope Plug-In for CA Unicenter

1)Install PageScope Plug-In for CA Unicenter in UnicenterTNG, following the InstallShield instructions.

(*)Please stop "Auto Discovery" if it runs.

2)Run "Auto Discovery" to discover Minolta devices.

3)In the 2-D and 3-D map, you can see the Minolta devices with their icons and their 3-D image files.

4)Select the button of "Management Page" after this Plug-In adds the items of "Management Page" to the popup menu. A web browser (such as Internet Explorer and NetScape Navigator) will be opened. And this Plug-In will show you an internal web server(*).

(*)You can access Minolta devices via HTTP and you can monitor the status and/or change settings from any web browser.

[Note] If the devices are in an error or a warning status, the colors of the icons and the images will be changed with a message "Critical" or "Warning". This Plug-In also sends a message to UnicenterTNG such as "Agent : Minolta Printer Down" in such a status. (UnicenterTNG has a management console based on a text.)
