

KONICA MINOLTA

Giving Shape to Ideas

Empowering a New Multimedia Generation.

libraries

Konica Minolta's commitment to libraries, educators and archivists helps make information more accessible to everyone – stretching budgets, reducing costs and boosting productivity as it opens a new generation of opportunities in the digital era. Konica Minolta offers a complete range of industry-leading hardware and software solutions for scanning, printing, networking and streamlining administrative workflow – so library professionals can improve services and expand access to meet current and future needs.

Scan
DIVA

Capture and discover.

Check out the many ways that Konica Minolta book scanners, software and bizhub® MFPs enhance the value of library materials as a vital community and institutional resource in the digital era – a resource that combines printed books, online data and digital multimedia information while adopting new software solutions to recover costs and decrease paper waste.

You can count on high-performance Konica Minolta scanners to scan and digitize your color and B&W originals with superior image quality and high-speed, cost-effective operation. Our line of book scanners is perfect for digitizing and sharing newspapers, oversized artwork and originals, fragile bound volumes, special collections, maps, prints, scientific records, books and other bound materials.

Konica Minolta scanners are simple and safe to use, with face-up scanning that protects stiff bindings and valuable originals. Flexible scanning modes for books and single pages and selectable scan resolution from 200 dpi to 600 dpi allow you to match scanning power to the needs of

each original. Our book scanners also automatically compensate for page curvature and automatically erase centerline shadows, page borders, and images of fingers holding down pages for scanning.

Powerful ScanDIVA operation with ImageDIVA software.

The powerful ScanDIVA Desktop Color Book Scanner is an ideal example of Konica Minolta's leadership in serving the needs of library professionals, enabling you to scan a large full-color page in about 6 seconds. For digitizing maps, newspaper pages and large-scale graphics, photos or artwork, the ScanDIVA accepts originals up to 18" x 24". You can also scan three-dimensional objects up to two inches in height – creating sharp, highly detailed images of coins and medals, toys, jewelry, textiles, decorations, archeological artifacts and other small art objects and collectibles. An optional glass plate unit gently flattens the surface of your original for perfect scans every time.

Image DIVA software provides a simple, intuitive interface that makes both scanning and printing quick and effortless. For total flexibility in a wide range of scanning applications, you can choose left-page, 2-page spread

or right-page scanning, adjust scan sizes, select portrait or landscape orientation, and set Scan Mode according to the needs of your original: Color, B&W Photo, or B&W Text. Built-in support for ICC profiles allows designers and graphics professionals to match color profiles and reproduce color tones and shades with exacting precision.

You can also display your image on screen, zoom in on scan areas for a closer look, and fine-tune exposure to achieve the results you want – then preview your image before printing to save time, minimize the need for reprints, and select print output to any bizhub MFP or other networked printer. High-speed USB 2.0 interface makes network connection quick and simple – and when print data is sent to the print spooler, the image is automatically cleared from your screen.

Managing Your Printing, Controlling Your Costs.

Konica Minolta scanning and printing solutions make hard-copy output more cost-effective, eco-friendly, secure, and convenient. You can control and reduce cost by tracking, managing and enforcing print policies to curtail wasteful printing habits. And with compatible cost-recovery systems, Konica Minolta scanners enable librarians to allow guests and visitors access to print and copy materials.

Intelligent authentication built into most bizhub MFPs directly integrates chargeback systems such as Pharos, Equitrac, and Konica Minolta's PageScope® Enterprise Suite. Konica Minolta book scanners also integrate with 3rd-party cost-recovery solutions from ITC Services and Jamex, including both card-type and coin-operated vending stations for user-directed scanning and printing in public-access areas.

Earth smart.

In addition to protecting originals and preserving materials, Konica Minolta is leading the way in environmental initiatives that lower power consumption, reduce emissions and promote recycling.

Helping libraries, educators and archivists protect the planet.

Our bizhub MFPs and printers feature fast warm-up and first-copy output to reduce waiting time, with power-saving standby modes and energy-efficient operation. Our exclusive Simitri® toner formulation

delivers high-resolution output while using plant-based biomass material to reduce environmental impact. And our Clean Planet programs provides cost-free recycling of all your Konica Minolta consumables, including toner, imaging units, developer units and drums.

About Konica Minolta

Konica Minolta can help give shape to your ideas and partner with you to achieve your corporate objectives. Contact us to realize opportunities in:

Information Management

- Enterprise Content Management (ECM)
