

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

SAY HELLO TO THE NEW FACE OF YOUR FRONT OFFICE.

**Meet ALICE. She is friendly. Smart.
And completely virtual.**

Meet ALICE Receptionist™. Your new receptionist. She greets and interacts with visitors when they enter your lobby. But ALICE is different — she is a virtual visitor management system like no other. ALICE uses a touch screen and live video technology to directly connect visitors with your employees, greeting them and notifying staff when a visitor enters your office space. Much more than a computerized receptionist, ALICE ensures you are providing a consistent customer service experience for guests and increased security (including ID screening and validation) for your office — while saving money by forgoing a full-time staff member to manage your front desk.

ALICE is just one of the ways Konica Minolta is reshaping the Workplace of the Future™, helping you work smarter, more productively and more collaboratively. Giving shape to ideas that will reinvent the way organizations work today — and tomorrow.

In business, you only get one chance to make a first impression. ALICE makes sure it is a good one.

As the leader in Virtual Receptionist technology, ALICE Receptionist is committed to offering the most innovative, feature-rich product, whether you are managing multiple buildings or a single office location. Businesses and government agencies of any size will benefit from:

VISITOR MANAGEMENT

- Visitor check-in/check-out
- Employee notification of visitors' arrival
- Visitor badges
- Photo ID

SECURITY

- Video communications with visitors
- Active visitor reports (who is currently in the building)
- Capture visitor images
- Screening using native databases
- ID scanning and validation

CHOOSE FROM SELF-SERVICE OR OPERATOR MODE

ALICE works the way your company does, providing flexibility for you and your employees. Self-Service Mode allows visitors to find and connect with employees via a directory, simply by touching the screen. Operator Mode requires the company to designate an employee (Operator) to manage the lobby. ALICE detects when a visitor arrives and immediately notifies the designated Operator — no matter where they may be.

INTERACTIVE INFORMATION

- Building events calendar
- Maps
- Custom HTML pages

VISITOR AND EMPLOYEE COMMUNICATIONS

- 2-way or 1-way video communications
- Integration with all major VoIP-/SIP-enabled phone systems
- Integration with Microsoft Skype for Business and Microsoft Lync

PARTNERSHIP

Konica Minolta can help give shape to your ideas and partner with you to achieve your corporate objectives.

IT INFRASTRUCTURE REVIEW

Let Konica Minolta take the guesswork out of maintaining a healthy and secure company network. Get actionable insight with a high-level review of your IT to help you identify areas of concern and risk with your network. We will deliver a detailed report of our findings, and provide a no-obligation strategy session with one of our Solutions Architects to review the results.
