## PARTNER WITH A LEADER IN ENVIRONMENTAL PROGRESS

Konica Minolta doesn't just talk about environmental goals, we take action. We developed a technology that blends polyethylene terephthalate (PET) plastic with Polycarbonate (PC) from water bottles to create a recycled material that can be used in the outer casing of MFPs— a first in the industry.

We are also a SmartWay partner with the U.S. Environmental Protection Agency (EPA), agreeing to reduce emissions and fuel use in logistics activities. In addition, Konica Minolta is a member of Two Sides, where we take the lead in environmentally conscious printing—educating communities about the importance of sustainable forestry and eco-friendly paper goods.
