Phoenix Healthcare

Challenges.

In a networked healthcare environment, regulatory compliance requires a secure method for printing prescriptions. Preprinted prescription forms can be costly and sometimes require dedicated printers. Konica Minolta has a better way: Dispatcher Phoenix Rx Shield, a simple and secure solution that leverages the power of your Konica Minolta bizhub® devices.

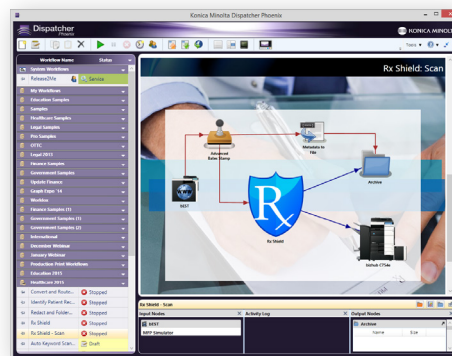

Secure Prescriptions Using Plain Paper.

Dispatcher Phoenix Rx Shield lets you print prescriptions on plain paper, saving money and streamlining processes while complying with tamper-resistant security requirements – including the following essential features:

- Anti-copy pantograph
- Auto-erasure and modification detection
- Pharmacist notification of security features

Convenient, Secure Printing.

Using Rx Shield with your Konica Minolta bizhub multifunctional peripheral (MFP) or bizhub desktop printer offers unparalleled efficiency, maximizes the investment in technology located throughout your facility, reduces costs, and ensures compliance with the security procedures governing prescriptions in today's networked healthcare environment.

Automated Document Workflow Solution.

Rx Shield is part of Dispatcher Phoenix Healthcare's advanced document processing solution, allowing healthcare providers to create an automated workflow for customizing and printing secure prescriptions.

Instant Savings.

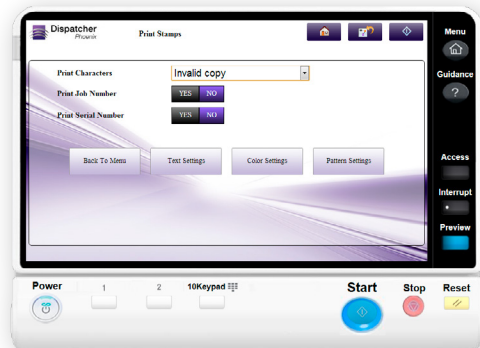

With reimbursement reductions, compliance requirements and tightening margins, every dollar is critical – and it is not uncommon for preprinted prescription forms to cost as much as \$0.19 to \$0.25 per page. If your healthcare organization is not bound by federal or provincial regulations requiring special paper or serialized forms for drugs, why not take advantage of the cost savings of Rx Shield? Printing even a small percentage of your overall script volume can result in excessive costs. Rx Shield saves thousands of dollars annually, turning waste into resources that can be applied toward initiatives to serve clinical or administrative needs and ultimately improve patient care.

Rx Shield = Flexibility.

Rx Shield provides a comprehensive solution to customize your prescriptions in a variety of ways, including:

- Pantograph messaging options
- Security background and colour options
- Advanced configuration settings
- Custom workflow tool

Your Rx Shield secure prescription printing solution can be set up as an automated process or accessed directly at the MFP – and customizing your settings can be as easy as tapping a few buttons on your MFP touchscreen.

Rx Shield at the MFP.

Quick keystrokes at the MFP panel let you control text, colour and pattern settings on your secure prescriptions.

Warning Text

Customizable Feature Text

Security Features Listing

The prescription contains the following security features: 1) A background pantograph to prevent erasure and/or text modifications. 2) Warning text (Invalid Copy, etc.) that appears when the prescription is copied. 3) Warning box listing the security features that are present on the document.

Comparison.

Comparison of an original prescription protected by Rx Shield vs. the same prescription copied. Note that the lightly patterned background pantograph reveals warning text when the prescription is illegally copied.

Copy Protection Features.

A prescription protected by Rx Shield has a background pantograph that prevents erasures or text modifications, customized warning stamps, and a Security Features Warning Box that is added to the bottom of each prescription, alerting pharmacists to the security features present on the page.

Customized.

Rx Shield is included as part of Dispatcher Phoenix Healthcare and available as an option for all other versions of Dispatcher Phoenix, a family of automated document workflow solutions from Konica Minolta. For any organization, Dispatcher Phoenix can optimize business processes, reduce costs, and increase productivity – providing advanced features such as Release2Me, our convenient print release system, forms processing, advanced Bates stamping, intelligent redaction, metadata routing, PDF and Microsoft Office file conversion, barcode recognition, zonal OCR, and connectors to a variety of document management systems and cloud storage providers.

Every version of Dispatcher Phoenix includes the following productivity features:

- Graphical Workflow Builder tool with drag-and-drop functionality
- Workflow Scheduler to run your workflow on the dates/times you need
- Full integration with the MFP using a visually enhanced display
- Document indexing and folder browsing at the MFP
- Robust authentication options for secure access
- Support for graphical and native MFP user interfaces

Visit kmb.konicaminolta.us/dispatcherphoenix for more information on other Dispatcher Phoenix offerings.

Rx Shield only works with Konica Minolta devices that support Copy Protection.

Rx Shield supports any Healthcare System that allows for printing prescriptions as PDFs or that can use the Dispatcher Phoenix PDF Print Driver that comes with the Rx Shield solution.
