

MORE THAN MEETS THE EYE

INTELLIGENT VIDEO SECURITY SOLUTIONS

Provide better security for your employees, premises and surrounding areas from MOBOTIX & Konica Minolta.

Face Mask Detection: Ensure compliance with your policies including wearing face masks in public and common areas.

Thermal Screening: As the first layer of mitigating risk, using MOBOTIX thermal cameras to detect elevated body temperature helps keep staff & visitors safe.

Perimeter Protection: MOBOTIX cameras can detect movement along your perimeter any time of day or night, even in total darkness, providing the ultimate defense.

Behavioral Analysis: Be aware of traffic patterns and direction movement with MOBOTIX camera people counting and heat mapping.

Indoor Surveillance: Continuous monitoring with MOBOTIX cameras of your property helps protect people and material assets.

Global Service Center (GSC) Support: Offering centralized customer care operations for MOBOTIX Remote Device Configuration and Remote Maintenance.

Cloud Storage: Keep all data stored safely in the cloud. And, with a cloud-based VMS there is no server or network storage on site, just the MOBOTIX cameras.

Hemispheric View: MOBOTIX hemispheric cameras provide a full 360 degree view to view all the activity.

Deterrence: Stay ahead of potential intruders, vandals, bullies and thieves with notifications, alerts and alarms of activity in specified areas.
