VUTEk® FabriVU 340i
Soft Signage Printer

Soft signage
that fits your needs

Lower total acquisition cost. Fast job turns. More premium-margin capability.
It's soft signage printing for the rest of us.

When you want to offer soft signage but don't have the higher volumes, floor space, or capex spend to justify a soft signage printer —let alone a dedicated calendar/heat press— you get a soft signage printer that fits your needs. Not the other way around.

The EFI™ VUTEk® FabriVU 340i dye-sublimation printer offers production level speeds, outstanding image quality, and inline fixation capability. It allows you to direct print to fabric and sublimate inline for one-offs that are immediately ready for finishing and shipping.

At a glance

- 3.4-metre wide aqueous-based soft signage printer with new EFI platen and extraction technology system that enables product to be sublimated inline

- Dramatic four-colour printing with a wide colour gamut and deep colour saturation for exceptional fabric display graphics

- Ultra-high resolution up to 2,400 dpi and four level greyscale printing with 4pL to 18pL drop sizes

- Production speeds up to 250 m² per hour

- Prints direct to fabric with inline fixation for graphics that are immediately ready for finishing and packing

- Inline sublimation can be turned off and paper transfer can be leveraged if off-line sublimation is available

- Ideal for the production of flags, banners, backlit displays, and other high-end display graphics, including one-offs

- Auto printhead cleaning station increases printer uptime

- Capping station to keep your system up and running

- Medium viscosity ink, high-resolution printheads, and ink recirculation system for improved ink yield
